Discover Scuba Diving

After a little theory divers enter a shallow practicing pool under supervision of a diving instructor. Here the diving novices learn how to move under water in a coordinated manner and also have their first contact with fish. After learning a few basic moves small groups of divers go into the diving park in company of the dive guides. All the moves are rehearsed in a shallow lagoon. Then they go down to 7 m depth.

During the next half hour the dive beginners get to marvel at large fish and dive through all the most important sections of the underwater park, except for the caves. Duration varies depending on prior experience (eg. Use of fins / snorkling experience) and lasts about 3 hours.
